Contents

Volume 12, number 1

Editorial 1

The measurement of relationships between regional structure and its evolution 3
H Beguin

Paired-comparison experiments and logit models: a review and illustration of some recent developments 21
N Wrigley

Growth and change in the analysis of rank-size distributions: empirical findings 41
E J Malecki

On the numerical measurement of accessibility 53
J W Weibull

The optimal management of natural recreational resources: a mathematical model 69
C S Bertuglia, R Tadei, G Leonardi

A measure-theoretic approach to urban fields with applications to origin-constrained travel 85
D P Ballou, J S Pipkin

Determinants and impact of padi farm fragmentation in the Muda Area, Kedah, northwest Malaysia 97
S T Wong, S H Tan

Letter to the editor 111

Reviews 113

Volume 12, number 2

Editorial 123

Modeling the dynamics of a system of metropolitan areas: a demoeconomic approach 125
P Gordon, J Ledent

The modelling of urban population density: a survey 135
K Zielinski

An analysis of the effects of information revision on the outcome of housing-market search, with special reference to the influence of realty agents 155
T R Smith, F Mertz

Attitudes and social categories: complementary explanations of innovation-adoption behavior 175
M A Brown

Explorations into the relationship between spatial structure and spatial interaction 187
D A Griffith, K G Jones

Improving energy efficiency in community land-use-transportation systems 203
R Sharpe

Urban planning and social welfare 217
B Walker

Algorithm 8: Graphic and mathematical descriptions of inequality, dissimilarity, segregation, or concentration 227
J T Darden, A S Tabachneck (referee J Raine)

Reviews 235

Volume 12, number 3

Editorial 245

District size and party electoral strength: a comparison of sixteen democracies 247
J O'Loughlin

Congressional-incumbent reelection success and federal-outlays distribution: a test of the electoral-connection hypothesis 263
J C Archer

Patterns of building society and local authority mortgage lending in the 1970s 279
K A Bassett, J R Short

Locational models for systems of private and public facilities based on concepts of accessibility and access opportunity 301
L Bach

An application of economic interaction models to the analysis of spatial effects of economic integration 321
J Bröcker

Transport studies and the quality of life 339
R E Allsop

Reviews 357

Volume 12, number 4

Editorial 367

Energy, agriculture, and water: a multiobjective programming analysis of the operations of the Aswân High Dam 369
G Guariso, K E Haynes, D Whittington, M Younis

Transitivity and United States migration streams: a comment 381
P B Slater

The tipping-point model: prediction of change in the racial composition of Cleveland, Ohio, neighborhoods, 1940–1970 385
W A Schwab, E Marsh

A probability model for the effects of distance on the demand for multiple facilities 399
C S Tapiero

Some thoughts on the effects on Australian urban transport of structural economic change 409
K W Ogden

Alice through the looking glass: marginalisation in the Aboriginal town camps of Alice Springs 427
D Drakakis-Smith

Urban labour productivity and regional development strategies 449
L H Wang, S L Wong

A comment on the papers from the BSRSA Workshop on Regional Science Methods in Structure Planning 463
D C Simmonds

Reviews 469

Volume 12, number 5

Essays in multistate mathematical demography: special IIASA issue

Editorial 485

Foreword 487

Introduction to multistate mathematical demography 489
A Rogers

Multistate demographic accounts: measurement and estimation procedures 499
P H Rees

Multistate life tables: movement versus transition perspectives 533
J Ledent

Multistate analysis: tables of working life 563
F J Willekens

Multistate dynamics: the convergence of an age-by-region population system 589
K-L Liaw

Multistate demography and its data: a comment 615
N Keyfitz

Volume 12, number 6

Editorial 623

Regional multiobjective planning of water supply and the disposal of residuals with due regard to intraregional population distribution 627
Y Kitabatake, T Miyazaki, M Takahashi

Vacancy chairs, information filters, and interregional migration 649
R D MacKinnon, P Rogerson

The effect of relative coefficient size on input-output multipliers 659
R C Jensen, G R West

Some aspects of the geography of political participation in Western Australia 671
D Rumley

Higher-order factor analysis and functional regionalization: a case study in South Wales, 1971 685
W K D Davies

The classification of local authorities in the UK Inner Urban Areas Act 1978 703
C G Bentham

An exploration of the nature and rationale of a systemic model 713
Chang-i Hua

Comments on Alonso's 'theory of movement' 727
A G Wilson

Letters to the editor 733

Reviews 735

Volume 12, number 7

Editorial 745

Evaluating the effects of transportation-land-use policies on housing values and household welfare 747
A Anas

Solar energy and access to sunlight: an optimization model of energy supply and land-use design 765
J-M Guldmann

Industrial heterogeneity and spatial hierarchy in multiregional freight-generation models 787
A Benheddi, D E Pitfield

Modeling out-migration from depressed regions: the significance of origin and destination characteristics 799
G L Clark, K P Ballard

Calibrating urban residential location models 3: empirical results for non-US cities 813
S H Putman

Additive measures of perceived accessibility 829
T E Smith

Exchanging regional input-output coefficients: a reply and further comments 843
G J D Hewings, B N Janson

Reviews 855

Volume 12, number 8

Editorial 867

The application of cluster analysis to entrepreneurial perception of regional economic environments
B M Barr, N M Waters, K J Fairbairn 869

Spatial aspects of epidemiological phenomena and of the provision and utilization of health care services in Australia: a review of methodological problems and empirical analyses
R J Stimson 881

Revealed-preference theory and spatial choices: some limitations
D Maclennan, N J Williams 909

A methodological note on the use of regression equations for the purpose of simulating change in urban location patterns
Alan W Evans 921

Simulating the structure of a regional economy
F J Harrigan, J W McGilvray, I H McNicoll 927

Paratransit: a commentary
P J Rimmer 937

Industrial decline, regional policy and the urban-rural manufacturing shift in the United Kingdom
D E Keeble 945

Computer Program 2: A program to draw four types of statistical maps on a vector plotter (STATMAP)
J J Utano 963

Letter to the editor 967

Reviews 971

Volume 12, number 9

Editorial 981

Calculation of the equilibrium configuration of shopping facility sizes
P A Phiri 983

A shortcut method for computing final demand multipliers for small regions
P J Phibbs, A J Holsman 1001

An interactive strategic model of transport costs and metropolitan population dynamics
N Varaprasad 1009

On sudden urban growth
G J Papageorgiou 1035

Spatial dynamics: some conceptual and mathematical issues
P Liossatos 1051

Algorithm 9: Simulation of autocorrelation for aggregate data
M F Goodchild (referee S Openshaw) 1073

Literature for teaching quantitative geography: technique by, for, but not of geographers
M J Webber 1083

Reviews 1091

Volume 12, number 10

Editorial 1099

Reformulation of the family life-cycle concept: implications for residential mobility
Clare M Stapleton 1103

Speculation and inflation in the market for house-building land in England and Wales
G Hyman, S Markowski 1119

Intransitivity, the spatial interaction model, and US migration streams
M F Goodchild, T R Smith 1131

Some models of age-specific fertility rates 1145
D B Pittenger

Simulation and analysis of structural properties of human settlement systems by means of entropy maximising models 1165
Yu S Popkov

Measurement of the effects of regional policy instruments 1191
H Folmer

External zones in the gravity model—some further developments 1203
J R Roy

Reviews 1207
